

EUROPEAN  
URBAN AGRICULTURE  
CASEBOOK

SUAVE Eurocluster is a novel pioneering European project focused on boosting urban agriculture towards sustainable and resilient urban food systems. The project is targeting European small and medium enterprises (SMEs) with the aim to support them in European and international development for the green and digital future of urban food supply. SUAVE will benefit SMEs with different types of support services valued of 1,050M EUR that include innovation vouchers, internationalization missions to USA, Canada and Mexico, as well as training for upskilling, networking and learning activities.

**Funded by  
the European Union**

*FUNDED BY THE EUROPEAN UNION. VIEWS AND OPINIONS EXPRESSED ARE HOWEVER THOSE OF THE AUTHOR(S) ONLY AND DO NOT NECESSARILY REFLECT THOSE OF THE EUROPEAN UNION OR EISMEA. NEITHER THE EUROPEAN UNION NOR THE GRANTING AUTHORITY CAN BE HELD RESPONSIBLE FOR THEM.*

# UNIMOS

alliance

UNIMOS is a dynamic organisation focused on accelerating global expansion, developing clusters, and fostering cross-sector collaboration. Since 2015, we have connected international clusters, enterprises, academic institutions, and regions, promoting strategic cooperation across various fields. Our approach is practical, participatory, and based on multi-level entrepreneurship. Our team has extensive experience implementing EU projects since 2004, both in Europe and Latin America.

# UNIMOS

alliance

## Our services:

- Forming strategic partnerships between the private sector, public sector, universities, and business support organisations at various local, regional, and international levels.
- Providing comprehensive support in the process of international expansion and the promotion of innovation.
- Facilitating international collaboration in innovation and internationalisation through participation in EU projects.
- Offering strategic consultancy at the international level and coordinating activities related to expanding operations into international markets.

# UNIMOS

alliance

## **Our achievements:**

- Implementing projects funded by the Mazovia Region from 2016 to 2023.
- Participating in European projects funded by Horizon 2020, COSME, and Horizon Europe programs. These projects have had an international scope, covering Europe, North America, South America, Africa, and Asia.

We offer services in building strategic partnerships between the private sector, public sector, universities, and business support organisations at local, regional, and international levels. We support global expansion and innovation by implementing EU consortium projects, sectoral and cross-sectoral cooperation, and providing strategic consultancy in international expansion.

**VEGEPOLYS  
VALLEY**

INTERNATIONAL PLANT CLUSTER

VEGEPOLYS VALLEY, a French plant competitiveness cluster, supports and brings together players across the entire plant value chain, from genetics to uses. Located in 4 historical French regions (Pays de la Loire, Auvergne-Rhône-Alpes, Brittany, Centre-Val de Loire) the cluster gathers more than 600 members from private sector, R&D institutes and training centers around INNOVATIVE SOLUTIONS, transforming them into CONCRETE APPLICATIONS, to develop BUSINESS, for agriculture and landscapes, food, health and others FOR, ON and WITH THE PLANT.

With an average of 70 projects/year, the cluster supports its members to think and create innovations which will be the future of the plant sector and which will help facing major challenges (climate change, agroecological transition, combine the development of food and non-food uses and ensure food security).

Thanks to VEGEPOLYS VALLEY international ambition and its expertise in European projects, the cluster supports its members toward new markets and business development, helping them to develop their international network, participating in international events and missions and finding the right partners for international projects.

**innoskart**  
DIGITAL CLUSTER

Founded in 2006, Innoskart is an Accredited Innovation Cluster of members from across Hungary, mainly providing digital services. Our mission is to accelerate the digital transformation of Hungary by supporting the dialogue between digital service providers and industrial manufacturing companies, as well as knowledge and technology transfer.

#### **Our services**

- Networking and personalised matchmaking. Cross-sectoral and horizontal strategic alliances. International projects and cooperation.
- Facilitating dialogue between digital service providers and user companies. Business and technology consulting, mentoring. Marketing and branding support.
- Thematic knowledge transfer and experience exchange. Industrial technology transfer support. Resource monitoring, channeling EU funding.

**FEMAC**

**FEMAC**

FEMAC is the cluster of agricultural machinery and production means in Catalonia, bringing together around 80 companies and entities across the entire value chain. This includes manufacturers of agricultural machinery, fertilizers, bio-stimulants, seeds, universities, research centers, and Agritech companies. Its purpose is to become an innovative ecosystem that helps its companies and members collaborate to identify innovative and sustainable solutions to address the major challenges of our society.

FEMAC was one of the first clusters at the European level in 2012 to be awarded the Gold Label by The European Secretariat for Cluster Analysis (ESCA), in recognition of excellence in cluster management. This recognition remains valid today, and in its quest for continuous improvement in processes, it also holds the ISO 9001 quality certification. Since 2017, it has participated in various European projects under the COSME, ERASMUS+, and H2020 programs, both to promote innovation and internationalization among its members and to enhance and share excellence among other clusters at the European level.
